## Wall Pack

americanlite®

We light your world™

## RWP™

25w/40w/55w  
60w/80w/120w

The RWP™ Series is the only LED wall pack in the industry designed to flexibly provide lighting upwards, downwards or both on a wall mount. RWP™ Series is a 2 in 1 unit that allows architects and contractors to easily spec out lighting for wall surfaces, and not having to worry about the direction of light, until during the time of install.

Easily rotate the wall pack's light heads 270° for illumination exactly where it's needed, and use both light heads to aim light up and down simultaneously. Using powerful LEDs, the RWP™ Series emits up to 14,400 lumens of natural white illumination, up to 135 lumens x watt, DLC Premium. The RWP Series wall pack is designed to replace HID fixtures while lasting twice as long, and eliminates frequent lamp and ballast replacements associated with traditional technologies.

A weatherproof die cast aluminum housing is powder coated for rust resistance, is sealed against moisture and environmental contaminants. Precision-molded PC lens, for superior uniformity and fixture spacing protects the LEDs, IK08 rating. The RWP™ Series operates within a wide 120-277v range, with a 4KV surge protection.

The geometric form of the RWP™ Series complements architectural expressions of precision, structure and line. The most popular configuration is the up and down light setting, allowing for the upper walls of a building to be lit up, as well as the bottom area for general safety. This design works well for both indoor and outdoor perimeter lighting, general area lighting and sports lighting.

The RWP™ Series is great for building accent lighting, parking lot lighting, security lighting, architectural lighting, loading bay lighting, commercial entryways, and more.

Outdoor wall mount lighting can create an inviting atmosphere by highlighting features of a building or structure. Building mounted lights also assists in creating ambient light for pedestrians and increase safety by illuminating potential danger to passerby.

Americanlite KWP™ Series is a full cutoff wall pack designed to maximize light in the desired area making it the smart choice for building-mounted doorway and pathway illumination on nearly any type of facility. Full cutoff KWP™ Series integrates a molded lens assembly for Dark Sky compliance.

The KWP™ Series wall pack is designed to replace HID fixtures while lasting twice as long, and eliminates frequent lamp and ballast replacements associated with traditional technologies. Using powerful LEDs, the KWP™ Series emits up to 18,240 lumens of natural white illumination, up to 152 lumens x watt, DLC Premium.

A weatherproof die cast aluminum housing is powder coated for rust resistance, is sealed against moisture and environmental contaminants. Precision-molded PC lens, for superior uniformity and fixture spacing protects the LEDs, IK06 rating. The KWP™ Series operates within a wide 120-277v range, with a 6KV surge protection.

The geometric form of the KWP™ Series complements architectural expressions of precision, structure and line. This design works well for both indoor and outdoor perimeter lighting.

The KWP™ Series is great for building accent lighting, parking lot lighting, security lighting, architectural lighting, loading bay lighting, commercial entryways, and more.

## AWP™

15w/30w/50w/80w/100w/120w

Single CCT

CCT & Power Selectable

By highlighting specific characteristics of a building or structure, outdoor wall mount lights can create a welcoming atmosphere, in addition to providing ambient lighting for pedestrians, building mounted lights also improve safety by highlighting areas that could present a threat to onlookers.

The low-profile, architectural-style Americanlite® AWP™ Series LED Wall Pack combines value and adaptability. The AWP™ Series is the ideal choice for building mounted, doorway, and walkway illumination on almost any type of facility because it maximizes light in the intended area.

The Americanlite® AWP™ Series offers an output of up to 15,000 delivered lumens thanks to unique reflector technology, high-quality optical components, and trustworthy thermal management. Compared to conventional HID solutions, AWP™ Series LED Wall packs offer energy and maintenance savings of up to 85%.

The Americanlite® AWP™ Series has an IP65 rating due to its weatherproof, tough die-cast aluminum construction, back box with lockable lock hinges, stainless steel hardware, and sealed and gasketed optical compartment. PC lenses with an IK07 rating were computer engineered for greater uniformity and LED protection. The AWP™ Series features a broad operating range of 120–277V, 0–10V dimming, and up to 6KV surge protection. Photocell is standard on all wall packs, motion sensors are optional.

With flexibility and ease of installation in mind, Americanlite® AWP™ Series wall packs are designed with installers in mind. To meet the needs of your outdoor lighting project, tilt a wall pack by 45° or even 90° to transform it into a floodlight or an area/site luminaire. Optimized optical control and efficiency is provided by the lighting distribution beam, which lowers operating costs while increasing fixture spacing.

Architectural statements of accuracy, structure, and line are complemented by the slim design form of the AWP™ Series. This layout works nicely for perimeter lighting both inside and outside. The Americanlite AWP™ Series is excellent for accent lighting in buildings, security lighting in parking lots, architectural lighting in buildings, lighting in loading bays, lighting in business entry ways, and lighting in organizations like schools and institutions.

## WVG™

40w/60w/80w/100w/120w

CCT & Power Selectable

Outdoor wall mount lighting can create an inviting atmosphere by highlighting features of a building or structure. Building mounted lights also assists in creating ambient light for pedestrians and increase safety by illuminating potential danger to passerby.

Americanlite® WVG™ Series is a full cutoff wall pack designed to maximize light in the desired area making it the smart choice for building-mounted doorway and pathway illumination on nearly any type of facility. Full cutoff WVG™ Series integrate a molded lens assembly for Dark Sky compliance. Using powerful LEDs, the WVG™ Series emits up to 135 lumens x watt, DLC Premium.

A weatherproof die cast aluminum housing is powder coated for rust resistance, is sealed against moisture and environmental contaminants. Precision-molded PC lens, for superior uniformity and fixture spacing protects the LEDs, IK08 rating. The WVG™ Series operates within a wide 120-277v range, with a 6KV surge protection. Americanlite® WVG™ Series offers the widest range of options to match any requirement.

We have incorporated many standard features: CCT Selectable, CCT & Power Selectable (100w & 120w models) and Integrated photocell. Options such as external SPD 10KV, Motion & PIR Sensors, 277V-480V drivers may be selected, just to make WVG™ Series one of the most complete LED wallpacks on the market. The geometric form of the WVG™ Series complements architectural expressions of precision, structure and line. This design works well for both indoor and outdoor perimeter lighting.

The WVG™ Series is great for building accent lighting, parking lot lighting, security lighting, architectural lighting, loading bay lighting, commercial entryways, and more.

## GWP™

25w/40w/60w/80w  
100w/120w 140w/150w  
Single CCT  
CCT & Power Selectable

By highlighting specific characteristics of a building or structure, outdoor wall mount lights can create a welcoming atmosphere, in addition to providing ambient lighting for pedestrians, building mounted lights also improve safety by highlighting areas that could present a threat to onlookers.

Americanlite® GWP™ Series LED Wall Pack combines value and adaptability; is the ideal choice for building mounted, doorway, and walkway illumination on almost any type of facility because it maximizes light in the intended area.

The Americanlite® GWP™ Series offers an output of up to 21,000 delivered lumens thanks to high-quality optical components, and trustworthy thermal management. Compared to conventional HID solutions, resulting in great energy and maintenance saving, of up to 85%.

The Americanlite® GWP™ Series has a Wet location / IP65 rating due to its weatherproof, tough die-cast aluminum construction, powder coated for rust resistance, and gasketed optical compartment. The borosilicate glass refractor is specifically designed to maximize light extraction and create a fully luminous luminaire for a better nighttime look. Glass lens engineered for greater uniformity and LED protection, IK05 rating. Driver 0-10V dimming 120-277V, up to 6KV surge protection. GWP™ Series comes standard with internal photocell, and optional 10KV or 20KV SPD, MS or PIR sensors. CCT and Power selectable option makes the GWP™ Series the best choice in the market.

Architectural statements of accuracy, structure, and line are complemented by the slim design form of the GWP™ Series. This layout works nicely for perimeter lighting both inside and outside. The Americanlite® GWP™ Series is excellent for accent lighting in buildings, security lighting in parking lots, architectural lighting in buildings, lighting in loading bays, lighting in business entry ways, and lighting in organizations like schools and institutions.

## WP Pro™

29w/40w/60w/80w  
100w/120w/150w

CCT / Power / Beam Selectable

The traditional Wallpack luminaire is now available with the most competitive cost and the most advanced Led technology. Featuring a classic day form, the WP Pro™ luminaire offers a traditional appearance and is powered by High-performance LEDs. Traditional design allows for a seamless upgrade from HID, eliminating the need to repaint. WP Pro™ luminaire is powerful yet energy efficient, capable of replacing up to a 400w HID luminaire while saving up to 86% in energy costs. Offering an expected service life of more than 20 years, the WP Pro™ eliminates frequent lamp and ballast replacements associated with traditional technologies.

The WP Pro™ luminaire consists of a rugged cast-aluminum housing with bronze polyester powder paint for lasting durability. Castings are sealed with gasket to inhibit the entrance of external contaminants. Impact resistant prismatic Glass lens designed for superior lighting distribution, uniformity and fixture spacing. Lumileds® 2835 Led Chips & state of the art UL 0-10V dimming driver with 6KV surge protection. WP Pro™ Series comes standard with internal photocell. Housing is configured for mounting directly over a standard 4" outlet box (by others) or for surface wiring via any of two convenient 1/2" threaded conduit entry hubs. Designed for wall mounting above four feet from ground. The Beam, CCT & Power Selectable option makes WP Pro™ Series the most complete and affordable wallpack on the market.

The traditional shape helps maintain building aesthetics when replacing only a portion of your building's wall packs. WP Pro™ luminaire provide light where it's needed most, especially on carports, loading areas, walkways, entrances, driveways, pathways and around the perimeters of buildings.

## WP™

40w/60w/80w/100w/120w/150w  
CCT & Power Selectable

The traditional Wallpack luminaire is now available with CCT & Power Selectable technology. Featuring a classic dayform, the WP™ luminaire offers a traditional appearance and is powered by High-performance Lumileds LEDs. Traditional design allows for a seamless upgrade from HID, eliminating the need to repaint.

The WP™ luminaire is powerful yet energy efficient, capable of replacing up to a 400w HID luminaire while saving up to 86% in energy costs. Offering an expected service life of more than 20 years, the WP™ eliminates frequent lamp and ballast replacements associated with traditional technologies.

Rugged cast-aluminum housing with bronze polyester powder paint for lasting durability. Door is hinged on the side so door swings out of the way during installation and service. Castings are sealed with a one-piece gasket to inhibit the entrance of external contaminants. Impact resistant prismatic PC lens designed for superior lighting distribution, uniformity and fixture spacing. UL 0-10V dimming driver with 6KV surge protection. WP™ Series comes standard with internal photocell, optional wire guard, visor, MS or PIR sensors, and ER driver, CCT and Power selectable makes the WP™ Series the best choice in the market. Housing is configured for mounting directly over a standard 4" outlet box (by others) or for surface wiring via any of three convenient 1/2" threaded conduit entry hubs. Designed for wall mounting above four feet from ground.

The traditional shape helps maintain building aesthetics when replacing only a portion of your building's wall packs. WP™ luminaire provide light where it's needed most, especially on carports, loading areas, walkways, entrances, driveways, pathways and around the perimeters of buildings.

## WPX™ 28w/40w/60w Single Power & Power Selectable

The conventional Wallpack luminaire is now offered at the most affordable price and with the most cutting-edge LED technology. The WPX™ luminaire gives a conventional appearance and is powered by High-performance LEDs. It has a traditional dayform. Traditional architecture eliminates the need to repaint by enabling a seamless upgrade from HID.

The WPX™ luminaire is strong yet economical, able to replace up to a 400w HID light while reducing energy expenses by up to 86%. The WPX™ removes the need for frequent lamp and ballast replacements associated with conventional technologies by providing an expected service life of more than 20 years.

The durable cast-aluminum housing of the WPX™ luminaire is painted with bronze polyester powder paint for long-lasting durability. Gaskets are used to seal castings to prevent the entry of outside pollutants. Designed for optimum lighting distribution, homogeneity, and fixture spacing, the impact-resistant prismatic PC lens. Modern UL 0-10V dimming driver, Lumileds 2835 LED chips, up to 6KV surge protection, and an integrated photocell are all included as standard. One of the most comprehensive LED wallpacks on the market, WPX™ luminaire offers options like Power Selectable and external SPD 10KV or 20KV.

The housing can be wired through either of two easy 1/2" threaded conduit entrance hubs or mounted directly over a conventional 4" outlet box (by others).

When only a fraction of your building's wall packs need to be replaced, the conventional shape aids in maintaining architectural aesthetics. Wherever lighting is most needed, such as on carports, loading docks, sidewalks, entrances, roads, pathways, and around the perimeters of buildings, WPX™ luminaire offer illumination.

## MWS™

**15w/20w/30w**  
**Single CCT / Single Power**  
**CCT & Power Selectable**

The MWS™ LED Wall Pack Series incorporates advanced LED technology and optical design to bring you a slim-profile luminaire with uncompromising performance.

The MWS™ LED wall mount luminaire combines optical performance, energy efficiency and long-term reliability in an advanced, low-profile design. Utilizing the latest LED technology, with CCT, the MWS™ luminaire delivers unparalleled uniformity resulting in greater installation spacing. This fixture provides area coverage equivalence up to 100W Metal Halide while achieving substantial energy and maintenance savings.

The MWS™ Luminaire PC front cover is impact-resistant polycarbonate which is fully gasketed. All electronics are protected in the upper housing. Housing is sealed against moisture and environmental contaminants. Lumileds 2835 LEDs, UL 0-10v Dimming Driver with 2.5KV Surge protection and integral photocell (Turn-on<30Lux /Turn-off>100Lux) operate at 120v-277v and are fully enclosed in the upper housing. There are no user serviceable parts. Back housing easily mounts to any recessed junction box. With all electronics in upper housing the open lower section makes wiring easy.

The Innovative MWS™ wall mount luminaire delivers a broad selection of solutions with superior illumination, reliability, ease of installation, controllability, and application versatility, and multiple control solutions all in a sleek, architectural style. For outdoor applications such as building entrances & perimeter lighting, side and rear exit doors, stairways and entry path, loading docks, schools, apartment buildings, retail & commercial buildings.

## MWP™

15w/20w/30w

The popular Mini Wallpack luminaire is now available with long-lasting, energy-efficient LED technology. Featuring a classic dayform, the MWP™ Luminaire offers a traditional appearance and is powered by advanced LEDs. This fixture was designed to fit seamlessly — eliminating unwanted markings from the removal of older fixtures. The MWP™ luminaire is powerful yet energy efficient, capable of replacing up to a 70W HPS wall pack while saving up to 80% in energy costs. With longlife LEDs, the MWP™ Luminaire eliminates frequent lamp and ballast replacements associated with traditional technologies.

Back plate is die-cast aluminum. Front cover is impact-resistant polycarbonate which is fully gasketed. All electronics are protected in the upper housing. Housing is sealed against moisture and environmental contaminants. Protective polycarbonate lens covers the LEDs. Light engine consists of Lumileds 2835 high-powered, long-life, high-efficacy LEDs mounted on an internal aluminum heat sink to maximize heat dissipation and promote long life. UL Driver with 2.5KV surge protection and integral photocell (Turn-on<30Lux /Turn-off>100Lux) operate at 100v-277v and are fully enclosed in the upper housing. There are no user serviceable parts.

Back housing easily mounts to any recessed junction box. With all electronics in upper housing the open lower section makes wiring easy. Mount on any vertical surface. Not recommended in applications where a sprayed stream of water can come in direct contact with polycarbonate lens.

The MWP™ luminaire combines traditional wall pack design with high output LEDs to provide an energy-efficient, low maintenance LED wall pack suitable for replacing up to 100W MH fixtures. The traditional shape helps maintain building aesthetics when replacing only a portion of your building's wall packs. The MWP™ luminaire is for outdoor applications such as personnel doors, loading areas, driveways and parking areas. The MWP™ luminaire is for outdoor applications such as building entrances & perimeter lighting, side and rear exit doors, stairways and entry path, loading docks, schools, apartment buildings, retail & commercial buildings.

## MW2™

13w/18w/26w

The popular Mini Wallpack luminaire is now available with long-lasting, energy-efficient LED technology. Featuring a classic dayform, the MW2™ Luminaire offers a traditional appearance and is powered by advanced LEDs. This fixture was designed to fit seamlessly — eliminating unwanted markings from the removal of older fixtures. The MW2™ luminaire is powerful yet energy efficient, capable of replacing up to a 70W HPS wall pack while saving up to 80% in energy costs. With long-life LEDs, the MW2™ Luminaire eliminates frequent lamp and ballast replacements associated with traditional technologies.

Back plate is die-cast aluminum. Front cover is impact-resistant polycarbonate which is fully gasketed. All electronics are protected in the upper housing. Housing is sealed against moisture and environmental contaminants. Precision-molded lens, for superior uniformity and fixture spacing.

Light engine consists of long-life, high-efficacy LEDs mounted on an internal aluminum heat sink to maximize heat dissipation and promote long life. Driver and integral photocell (turn on <20 lux and turn off >30-60 lux.) Operates at 120v-277v and are fully enclosed in the upper housing.

Back housing easily mounts to any recessed junction box. With all electronics in upper housing the open lower section makes wiring easy. Mount on any vertical surface. Not recommended in applications where a sprayed stream of water can come in direct contact with polycarbonate lens.

The MW2™ luminaire combines traditional wall pack design with high-output LEDs to provide an energy-efficient, low maintenance LED wall pack suitable for replacing up to 100W MH fixtures. The traditional shape helps maintain building aesthetics when replacing only a portion of your building's wall packs. The MW2™ luminaire is for outdoor applications such as personnel doors, loading areas, driveways and parking areas.

## MCWP™

15w

CCT Selectable

AC/Emergency Option

The popular Mini Wallpack luminaire is now available with CCT Selectable. Featuring a classic dayform, the MCWP™ luminaire offers a traditional appearance with a more compact and slim body. The MCWP™ luminaire is powerful yet energy efficient, capable of replacing HPS and MH wall packs while saving up to 80% in energy costs. With long-life LEDs, the MCWP™ luminaire eliminates frequent lamp and ballast replacements associated with traditional technologies.

MCWP™ Luminaire housing is die-cast aluminum. Front cover is impact-resistant polycarbonate which is fully gasketed. All electronics are protected in the upper housing. Fixture is sealed against moisture and environmental contaminants, Wet location-IP65, and the protective polycarbonate lens covers the LEDs to IK08 grade.

The MCWP™ luminaire PC Opal front cover and precision-molded reflector are combined for superior uniformity, fixture spacing, and visual comfort. Light engine consists of Lumileds led chips (80pcs\*2-SMD2835), high-powered, long-life & high-efficacy type, mounted on an internal aluminum heat sink to maximize heat dissipation and promote long life. 0-10V Dimming Daermay Driver operates 120v-277v; integral photocell (Turn-on<30Lux /Turn-off>130Lux) is fully enclosed in the upper housing. We offer a 5w emergency driver as an option, to make MCWP™ luminaire the perfect solution for outdoor wall mounting security fixtures.

The MCWP™ luminaire traditional shape helps maintain building aesthetics when replacing only a portion of your building's wall packs. MCWP™ luminaire is for outdoor applications such as building entrances & perimeter lighting, side and rear exit doors, stairways and entry path, loading docks, schools, apartment buildings, residential, retail & commercial buildings.

## DWP™

15w

CCT Selectable

AC/Emergency Option

The DWP™ Teardrop wallpack features a rounded architectural design with CCT Selectable. Featuring an eye catching dayform, the DWP™ luminaire offers an attractive appearance with a more compact and slim body. The DWP™ luminaire is powerful yet energy efficient, capable of replacing HPS and MH wall packs while saving up to 80% in energy costs. With long-life LEDs, the DWP™ luminaire eliminates frequent lamp and ballast replacements associated with traditional technologies.

DWP™ luminaire housing is die-cast aluminum. Front cover is impact-resistant polycarbonate which is fully gasketed. All electronics are protected in the upper housing. Fixture is sealed against moisture and environmental contaminants, Wet location-IP65, and the protective polycarbonate lens covers the LEDs to IK08 grade.

The DWP™ luminaire PC Opal front cover and precision-molded reflector are combined for superior uniformity, fixture spacing, and visual comfort. Light engine consists of Lumileds led chips (80pcs\*2-SMD2835), high-powered, long-life & high-efficacy type, mounted on an internal aluminum heat sink to maximize heat dissipation and promote long life. 0-10V Dimming Daermy Driver operates 120v-277v; integral photocell (Turn-on<30Lux /Turn-off>130Lux) is fully enclosed in the upper housing. We offer a 5w emergency driver as an option, to make DWP™ luminaire the perfect solution for outdoor wall mounting security fixtures.

The DWP™ luminaire teardrop shape elevates building aesthetics when replacing traditional wall packs. DWP™ luminaire is for outdoor applications such as building entrances & perimeter lighting, side and rear exit doors, stairways and entry path, loading docks, schools, apartment buildings, residential, retail & commercial buildings.

The Vigilante™ Series led wall luminaire is a stylish, fully integrated LED solution for building-mount applications. Vigilante™ series is designed with the specifier in mind. It features a sleek, modern design and is carefully engineered to provide long-lasting, energy-efficient lighting with a variety of control options for customized performance. High-performance illumination that lasts, it is ideal for replacing 100- 400W metal halide /HPS in wall-mounted applications with typical energy savings of 80% and expected service life of over 50,000 hours.

Vigilante™ Series optics are specifically designed to maximize the light in the desired area making it the smart choice for building-mounted doorway and pathway illumination on nearly any type of facility. State of the art driver with built in 4kV surge protector. ETL approved and IP65 rated. Universal voltage capacity 100v-277v 50/60Hz. Integrated Photocell included or no photocell, makes Vigilante Series a complete solution.

You have more options with Americanlite® CCT+ Power Selectable Technology™ to satisfy the demands of your project.

The energy savings, long life and easy-to-install design of the Vigilante Series make it the smart choice for building-mounted doorway and pathway illumination for nearly any facility.

## Warranty

---

Americanlite® is pleased to provide a 5 year limited warranty covering the LED fixtures on this catalogue. Americanlite® warrants that the LED fixtures comply with Americanlite®'s published specifications and are free from defects in materials and workmanship.

All our equipment is CE, ETL or UL approved and manufactured with approved components. Americanlite® reserves the right to change or improve the design or components of any of its products due to parts availability or changes in standards, without assuming any obligation to modify any product previously manufactured and without notice. All equipment is tested and inspected before shipment.

This warranty is void if the product is operated outside of its normal operating conditions. The foregoing warranty does not apply to failures caused by acts of God or as a result of any abuse, misuse, abnormal use, or use in violation of any applicable standard, code or instructions for use in installations, including, but not limited to, those contained in the Standards for the International Electrotechnical Commission. Americanlite® reserves and has the right to examine failed fixtures to determine the cause of failure, excessive lumen depreciation and patterns of usage.
