americanlite®

We light your world™

## Performer Pro X™

80w/100w/150w/200w/240w/300w  
CCT / Power / Beam Selectable

The Performer Pro X™ Series redefines what an LED area, site, and roadway luminaire can do, combining maximum performance, unmatched versatility, and exceptional value in a sleek, low-profile design. Engineered to replace 150W–1500W HID fixtures, it delivers energy savings of over 70% while meeting the most demanding lighting challenges.

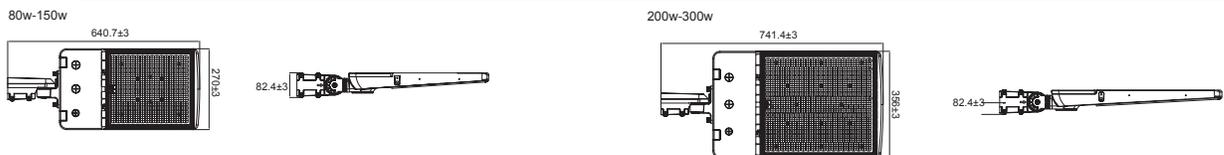

Equipped with Americanlite®'s advanced selectable technology, the Performer Pro X™ puts beam, CCT, and power control in your hands, offering 27 different configurations from a single fixture. High-efficiency molded optics paired with Lumileds® 2835 LED chips ensure optimized light distribution, superior application spacing, and uncompromising visual comfort.

From retrofit to new install, time is money and the Performer Pro X™ saves both. Its installer-friendly design speeds up mounting, while its innovative thermal management system maximizes heat dissipation to extend both fixture and LED lifespan. The rugged housing is polyester powder coated for superior resistance to fading, corrosion, and wear, with a standard bronze finish and optional white or gray colors available.

Every unit comes with a UL Class P, 0–10V dimming driver and internal 6kV surge protection, plus an external 10kV SPD for maximum defense against electrical surges. Optional 20kV SPD, motion sensors, and a full range of mounting brackets—including round, square, and yoke options—provide unmatched design flexibility for any application, whether building-mounted, pole-mounted, or roadway-installed.

Performer Pro X™ optics deliver uniform illumination for parking lots, walkways, building perimeters, roadways, and security zones. Designed to meet the toughest performance standards, it is not just a light—it is a complete lighting solution for the modern world.

## Performer Pro™

100w/120w/150w/200w/240w/300w  
Single Power & Power Selectable

The Performer Pro™ Series luminaire introduces a new level of photometric performance; with an outstanding 160 lumens per watt, creates sites with excellent uniformity, greater pole spacing and lower power density and expected service life over 100,000 hours.

In streets, roads, parking and in general areas, the Performer Pro™ replaces 150-1000W metal halide lights. The distribution is shaped to maximize efficiency and application spacing using the precision molded high efficiency optics with Lumileds® 2835 led chips. The nominal lumen packages range from 9,600 to 48,000 and are offered in Type III distribution. With Americanlite® Power Selectable Technology™, you have more alternatives to meet the demands of your project.

The Performer Pro™ luminaire delivers an innovative thermal management design that maximizes heat dissipation resulting in longer fixture and LED life. Housing and cast parts are finished in polyester powder coat paint, for superior protection against fade and wear; the standard finish is bronze. (White color available). The UL 1-10V dimming IP67 driver, with internal 6KV surge protection, (L-N:6KV, L-PE:6KV), is mounted to the fixture for optimal heat sinking and ease of maintenance. We have added an external 10KV SPD for maximum protection.

When it comes to installing and retrofitting site and area luminaires, time is money. The Performer Pro™ is designed to reduce installation time and costs by being quick and simple to install. For even greater design versatility for any building mount, street, and road applications, optional round/square, yoke, and slipfitter brackets are offered. By including the optional MS and PIR Sensors, you can maximize your energy savings.

The designed optics from the Performer Pro™ Series offer uniform illumination for parking lots, streets, paths, interior spaces of buildings, and security lighting applications. These stylish lights offer exceptional illumination, simple installation, and the Americanlite® reliability you've come to expect.

## Performer PCS™

70w/100w/150w/200w/240w  
/300w/375w/480w

Power & CCT Selectable  
Single Power/CCT

With an exceptional up to 150 lumens per watt, the Performer PCS™ Series luminaire generates sites with superb uniformity, better pole spacing, reduced power density, and a projected service life of over 120,000 hours, introducing a new level of photometric performance.

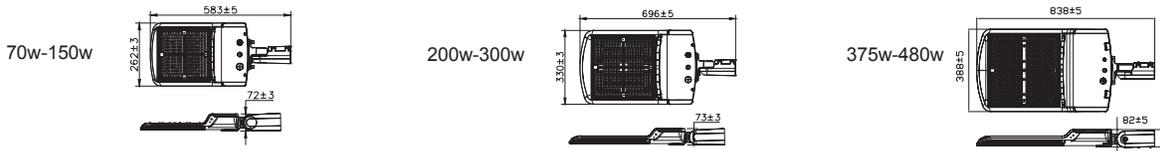

The Performer PCS™ replaces 150-1000W metal halide lights in streets, roads, parking lots, and other areas. Using custom molded high efficiency optics and Lumileds® 2835 led chips, the distribution is designed to maximize efficiency and application spacing. The nominal lumen packages are available in Type II, Type III, Type IV and Type V distributions and range in lumen output from 4,725 to 64,800. You have more options with Americanlite® CCT+ Power Selectable Technology™ or Single Power / CCT to satisfy the demands of your project.

Performer PCS™ luminaire delivers an innovative thermal management design that maximizes heat dissipation resulting in longer fixture and LED life. Housing and cast parts are finished in polyester powder coat paint, for superior protection against fade and wear; the standard finish is bronze. (White color available). The UL 0-10V dimming IP67 driver, with internal 6KV surge protection, (L-N:6KV, L-PE:6KV), is mounted to the fixture for optimal heat sinking and ease of maintenance. We have added an external 10KV SPD for maximum protection.

Time is money when it comes to installing and retrofitting area and site luminaires. The Performer PCS™ was engineered to make installation quick and easy; the electric compartment access is tool-less saving on both installation time and costs. Round/square, yoke, and slipfitter brackets are optional and can be used for building mount, street, and road applications for even more design flexibility. You can increase the amount of energy you save by adding the optional MS and PIR Sensors.

The Performer PCS™ Series' engineered optics provide uniform illumination for parking lots, streets, walkways, building interiors, and security lighting applications. These fashionable lights provide excellent illumination, easy installation, and the dependability you've come to expect from Americanlite®.

With an exceptional 150 lumens per watt, the Performer XCR™ Series luminaire generates sites with superb uniformity, better pole spacing, reduced power density, and a projected service life of over 120,000 hours, introducing a new level of photometric performance.

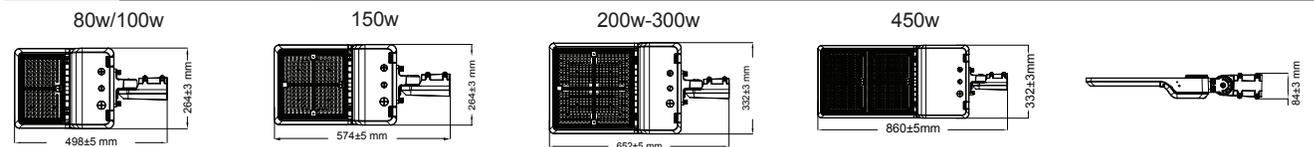

The Performer XCR™ replaces 150-1500W metal halide lights in streets, roads, parking lots, and other areas. Using custom molded high efficiency optics and Lumileds® 2835 led chips, the distribution is designed to maximize efficiency and application spacing. The nominal lumen packages are available in Type II, Type III, Type IV and Type V distributions and range in lumen output from 11,200 to 63,900. You have more options with Americanlite® CCT+ Power Selectable Technology™ to satisfy the demands of your project.

Performer XCR™ luminaire delivers an innovative thermal management design that maximizes heat dissipation resulting in longer fixture and LED life. Housing and cast parts are finished in polyester powder coat paint, for superior protection against fade and wear; the standard finish is bronze. (white and gray color available). The UL 0-10V dimming IP67 driver, with internal 6KV surge protection, (L-N:6KV, L-PE:6KV), is mounted to the fixture for optimal heat sinking and ease of maintenance. We have added an external 10KV SPD for maximum protection.

Time is money when it comes to installing and retrofitting area and site luminaires. The Performer XCR™ was engineered to make installation quick and easy; the electric compartment access is tool-less saving on both installation time and costs. Round/square, yoke, and slipfitter brackets are optional and can be used for building mount, street, and road applications for even more design flexibility. You can increase the amount of energy you save by adding the optional Motion Sensor.

The Performer XCR™ Series engineered optics provide uniform illumination for parking lots, streets, walkways, building interiors, and security lighting applications. These fashionable lights provide excellent illumination, easy installation, and the dependability you've come to expect from Americanlite®.

PF ≥.90	THD ≤20%	120,000
-40°C-50°C	6 YEAR Warranty	

The Performer XR™ Series LED area-site-roadway luminaire introduces a new level of performance, versatility and value in a low-profile design that delivers significant installation and energy savings greater than 70%. The Performer XR™ replaces 150-1500W metal halide fixtures in general area and roadway lighting applications.

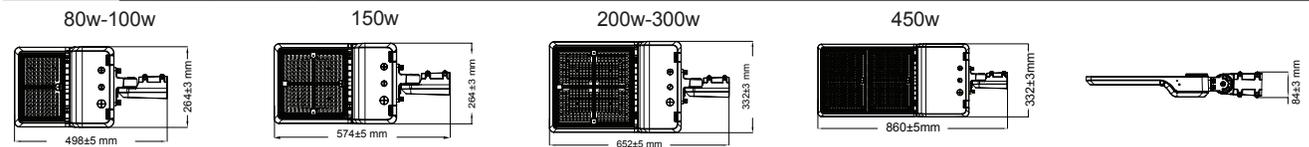

Time is money when it comes to installing and retrofitting area and site luminaires. The Performer XR™ was engineered to make installation quick and easy; the electric compartment access is tool-less saving on both installation time and costs. The Performer XR™ luminaire delivers an innovative thermal management design that maximizes heat dissipation resulting in longer fixture and LED life. Housing and cast parts are finished in polyester powder coat paint, for superior protection against fade and wear; the standard finish is bronze (white and gray color available).

Performer XR™ high efficiency molded optics, with Lumileds® 2835 led chips, are designed to shape the distribution, maximizing efficiency and application spacing, available in Type II, III, IV and V distributions with lumen packages ranging from 11,200 to 63,900 nominal lumens. The UL 120-277V 0-10V dimming IP67 driver, with internal 6KV surge protection, (L-N-6kV, L-PE:6kV), is mounted to the fixture for optimal heat sinking and ease of maintenance. We have added an external 10KV SPD for maximum protection.

Optional round / square & yoke brackets, Motion Sensor, 20KV SPD are available for even more design flexibility for any building mount, street and roadway applications.

The Performer XR™ engineered optics provide uniform illumination to walkways, parking lots, roadways, building areas and security lighting applications. Able to replace HID fixtures the Performer XR™ is designed to meet the toughest lighting challenges.

## Performer XCS™

100w/150w/200w/240w/300w/450w  
Power Selectable

The Performer XCS™ Series LED area/site luminaire introduces a new level of performance, versatility and value in a low-profile design that delivers significant installation and energy savings greater than 70%.

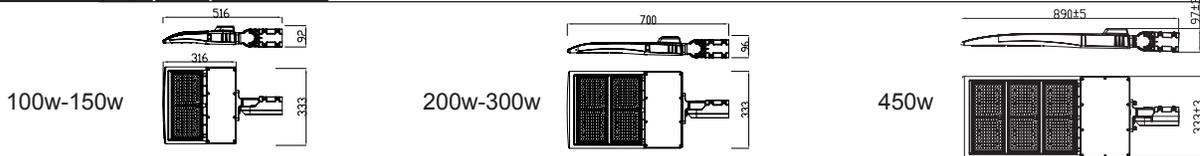

The Performer XCS™ replaces 150-1000W metal halide fixtures in general area lighting applications. The Performer XCS™ luminaire delivers an innovative thermal management design that maximizes heat dissipation resulting in longer fixture and LED life. Housing and cast parts are finished in polyester powder coat paint, for superior protection against fade and wear; the standard finish is gray (bronze and white color available). The UL 120-277V 1-10V dimming IP67 driver, with internal 6KV surge protection, (L-N-6kV, L-PE:6kV), is mounted to the fixture for optimal heat sinking and ease of maintenance. We have added an external 10KV SPD for maximum protection.

The precision molded high efficiency optics, with Lumileds® 2835 led chips, are designed to shape the distribution, maximizing efficiency and application spacing. Available in Type III, IV and V distributions with lumen packages ranging from 14,200 to 63,900 nominal lumens.

Time is money when it comes to installing and retrofitting area and site luminaires. The Performer XCS™ was engineered to make installation quick and easy, saving on both installation time and costs. Optional round / square, yoke and slipfitter brackets are available for even more design flexibility for any building mount, street and roadway applications.

The Performer XCS™ engineered optics provide uniform illumination to walkways, parking lots, roadways, building areas and security lighting applications. Able to replace HID fixtures the Performer XCS™ is designed to meet the toughest lighting challenges.

## Performer XS™

100w/150w/200w/240w/300w/450w

The Performer XS™ Series LED area/site luminaire introduces a new level of performance, versatility and value in a low-profile design that delivers significant installation and energy savings greater than 70%.

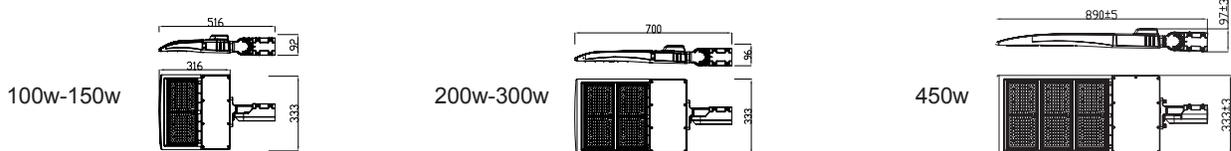

The Performer XS™ replaces 150-1000W metal halide fixtures in general area lighting applications. The Performer XP™ luminaire delivers an innovative thermal management design that maximizes heat dissipation resulting in longer fixture and LED life. Housing and cast parts are finished in polyester powder coat paint, for superior protection against fade and wear; the standard finish is bronze (white and gray color available). The UL 120-277V 1-10V dimming IP67 driver, with internal 6KV surge protection, (L-N:6KV, L-PE:6KV), is mounted to the fixture for optimal heat sinking and ease of maintenance. We have added an external 10KV SPD for maximum protection.

The precision molded high efficiency optics, with Lumileds® 2835 led chips, are designed to shape the distribution, maximizing efficiency and application spacing. Available in Type III, IV and V distributions with lumen packages ranging from 13,500 to 60,750 nominal lumens.

Time is money when it comes to installing and retrofitting area and site luminaires. The Performer XS™ was engineered to make installation quick and easy, saving on both installation time and costs. Optional round / square, yoke and slipfitter brackets are available for even more design flexibility for any building mount, street and roadway applications.

The Performer XS™ engineered optics provide uniform illumination to walkways, parking lots, roadways, building areas and security lighting applications. Able to replace HID fixtures the Performer XS™ is designed to meet the toughest lighting challenges.

## Warranty

Americanlite® is pleased to provide a 5, 5 or 7 year limited warranty covering the LED fixtures on this catalogue. Americanlite® warrants that the LED fixtures comply with Americanlite®'s published specifications and are free from defects in materials and workmanship.

All our equipment is CE, ETL or UL approved and manufactured with approved components. Americanlite® reserves the right to change or improve the design or components of any of its products due to parts availability or changes in standards, without assuming any obligation to modify any product previously manufactured and without notice. All equipment is tested and inspected before shipment.

This warranty is void if the product is operated outside of its normal operating conditions. The foregoing warranty does not apply to failures caused by acts of God or as a result of any abuse, misuse, abnormal use, or use in violation of any applicable standard, code or instructions for use in installations, including, but not limited to, those contained in the Standards for the International Electrotechnical Commission. Americanlite® reserves and has the right to examine failed fixtures to determine the cause of failure, excessive lumen depreciation and patterns of usage.
